9/24/2015	Secrets for SSIP Success: Leveraging Lessons Learned from Implementation of the State Personnel Development Grants	Directors' webinar	Julia Causey, Georgia Department of Education Jennifer Gonzales, Arkansas Department of Education Steve Goodman, Michigan Department of Education Kim Hartsell, Georgia SPDG	Since 2007, state education agencies have been using funds from their OSEP-funded State Personnel Development Grants (SPDGs) to improve their state systems of professional development and technical assistance to support the dissemination and implementation of best practices designed to improve results for children and youth with disabilities. In order to obtain the goals related to systemic improvement established in their grant applications, SPDG personnel have capitalized on the use of the implementation frameworks and effective school improvement strategies to create transformation zones where evidence-based practices can be implemented with fidelity and can be scaled to impact large groups of students. In this session, you hear from state staff from Arkansas, Georgia, and Michigan about successful frameworks and strategies from their SPDGs that they have incorporated into their State Systemic Improvement Plans. Some of the topics addressed include the focus on district vs. school models of improvement and the key components of the implementation frameworks including teams, drivers, and improvement cycles. These practical lessons learned can be of benefit to your state as you begin your development and implementation of the Phase II SSIP components whether or not you have a SPDG.	Directors' Webinar

3/6/2014	Use of Data to Improve Implementation & SPDG Project Lessons Learned	Directors' Webinar	Karen Blase, PhD, Director, SISEP	As many of you are already aware we are shifting the focus of some of our 2014 webinars from implementation drivers to topics to identified by SPDG participants at the recent National Meeting. To this end, the topic for the March call will focus on the use of data to improve implementation. This call focuses on the use of data to improve implementation. At the end this session we've set aside 10-15 minutes for a "Lessons Learned" segment by our friends from Pennsylvania, Shatarupa Podder & Janet Sloand. will reflect upon the implementation successes for their SPDG 2007-2012 initiatives	Directors' Webinar
2/6/2014	Measuring Collaboration	Directors' Webinar	Diana Autin, J.D., Executive Co-Director for Health and Family Support, Statewide Parent Advocacy Network, Inc. (SPAN) and Director of Region I Parent TA Center	Diana Autin begins the session presenting an overview of the Community of Care Consortium, a grant funded project focused on improving collaboration with stakeholders. Ms. Autin describes the project's implementation process, how they defined and measured collaboration, share examples of their successes and challenges, describe their project outcomes and how they are sustaining the work now that the initial funding is over. Following Diana, Courtney Salzer presents on WI FACETS and Wisconsin SPDG's collaborative work. She describes the paradigm shift that occurred when WI FACETS and SIG/SPDG began to focus on measuring collaboration, how their role as a parent center in a collaboration-focused initiative developed over time, and how measuring collaboration on the SIG/SPDG has positively impacted their other projects. 1/30/2014	Organizational Driver: Data Decision Support Systems to Improve Implementation	Directors' Webinar	Jennifer Coffey, PhD, OSEP Project Officer	This webinar builds upon what was learned at the 2013 SPDG National Meeting on the use of data to improve implementation. Dr. Jennifer Coffey begins the webinar with a debrief of Dr. Allison Metz' presentation on 'Data Guided Decision-Making: How Asking Questions Can Improve Fidelity'. Then, Jennifer leads the group in a discussion on how states applied their learning and took action to improve upon their data support decision system, as well as learn how states are approaching the overall 'data use life cycle'— defining the 'what' in concrete terms, measuring fidelity and outcomes, using data to modify the 'what', and then repeating the cycle using the 'modified what' to reach better outcomes.
