

District MTSS Capacity Assessment

St. Martin, K., Goodman, S., & Harms, A., LeVesseur, C. A. (2013). *District MTSS Capacity Assessment*. Unpublished instrument, Michigan Department of Education, Lansing, MI.

November, 2013

District MTSS Capacity Assessment Contributors:

- Melissa Nantais
- Christine Russell

Based on the District Capacity Assessment (DCA) for Scaling up of Evidence-based Practices. Duda, M.A, Ingram-West, K., Tadesco, M., Putnam, D., Buenerostro, M., Chaparro, E. & Horner, R. (2012). District Capacity Assessment, University of North Carolina, Chapel Hill.

Background

The “capacity” of a District to facilitate school-level implementation of evidence-based practices refers to the organization, activities and systems that exist at the District level and have a direct effect on the success of school leadership teams to adopt and sustain evidence-based practices. The District provides a continuum supports to its schools. Some Districts are small with limited resources and depend upon the Intermediate School District (ISD) directly for professional development and technical assistance to the District’s administrators and educators. Other times, the District accesses ISD (or other external supports) in order to develop their local capacity so the District can in turn, provide professional development and technical assistance to its staff.

Introduction to the DMCA

Purpose:

1. The primary purpose of the District MTSS Capacity Assessment (DMCA) is to assist districts with implementing a Multi-Tier System of Supports (MTSS) so that all schools within the District can improve their students’ academic and behavioral outcomes.
2. The DMCA is a tool the District Implementation Team can use to annually self-assess the need for capacity building at the District level and assess the impact and improvement of capacity development efforts. DMCA items address structures, procedures, and activities an District Implementation Team will engage in as they develop their internal capacity and prepare to support the development of their schools’ ability to implement evidence-based practices within a MTSS model.
3. The District Implementation Team can use the results from the DMCA to develop a plan for improving the District’s capacity along a continuum of direct and indirect supports for local implementation of MTSS.
4. The results will also be used by MiBLSi to inform statewide decision-making around improvement of District capacity, to evaluate the impact of MiBLSi supports, and for planning strategic supports to Districts partnering with MiBLSi to sustain and scale up MTSS implementation.
5. The DMCA will also be linked to a set of interim checklist tools to monitor progress toward the development of local capacity for the implementation of MTSS.

DMCA Components (Implementation Drivers):

Leadership, Organizational Environment, and Competency implementation drivers informed the development of the DMCA.

1. **Leadership:** mechanisms to develop support structures and systems to support MTSS practices. Leadership Drivers include the following:
 - a. Vision
 - b. Management/Coordination
 - c. Facilitative Administration
2. **Organizational Environment:** mechanisms to create and sustain hospitable organizational environments and systems for individuals to be able to effectively fulfill their roles and responsibilities for MTSS support. Organizational Environment Drivers include the following:
 - a. Decision Support Data System
 - b. Information
 - c. Resources
 - d. Feedback
3. **Competency:** mechanisms that help to develop, improve, and sustain one’s ability to implement a practice/intervention to benefit students. Competency Drivers include the following:

- a. Selection
- b. Training
- c. Coaching

Intended Participants:

The DMCA is completed by at least 3 members of the District Implementation Team (who have been trained in DMCA completion), and with the support of a trained DMCA facilitator (typically a MiBLSi project staff member and/or ISD MTSS Coordinator).

Districts just launching efforts to develop their capacity to support MTSS may use the DMCA to assess entry status and action planning. Districts that have been actively engaged in efforts to improve their capacity to implement evidence-based practices may choose to use the DMCA to build action plans and to assess if action plan efforts are resulting in change.

Schedule of DMCA Administration

The DMCA is typically completed in the spring and the results are used to develop an implementation plan to improve areas of need for the following school year. It is acceptable, however, for a District to complete the DMCA at any point during the year that would help achieve targeted functions and purposes.

Preparation for the DMCA and Administration

Prior to completing the DMCA, the District Implementation Team should make sure the following are in place:

1. The Team has been trained on what the DMCA is and how to complete it.
2. The Team has agreed to the time commitment necessary to complete the DMCA.
3. The Team has direct access to someone who can help clarify items and answer other questions while the team completes the DMCA.
4. Previously completed DMCA data/forms are available for reference.
5. Blank copies (paper or electronic) are accessible to all respondents.

Given the importance of the process and the complexity of the items, the anticipated duration to complete the DMCA and develop an action plan is **two to three hours**. Exact times will depend on the number of individuals participating in the DMCA and the familiarity of the team with the instrument and the process. The first implementation of the DMCA typically takes more time than later administrations.

1. An District administering their first DMCA should allocate up to three hours to complete the DMCA and develop an action plan; if more time is needed, it is recommended that a follow-up meeting be scheduled.
2. An District with (1) a team that has already done the DMCA in the past, and (2) has an active implementation plan, should allocate up to two hours to complete the DMCA.
3. Districts may develop an action plan after the entire DMCA has been administered and scored, or alternatively, an District may consider administering, scoring, and developing immediate and short-term activities for each subsection at consecutive intervals, with the intent to divide the amount of work time and improve productivity.

Outcomes from the DMCA Completion

Upon completion of the DMCA, results will yield Item Scores, Subscale Scores (based on the implementation driver categories) and a Total Score. District Implementation Teams will use the results to develop immediate and short-term activities to improve District capacity to support schools in the implementation of MTSS with fidelity and durability. These action items should be integrated into the District implementation support plan.

Glossary of Terms

- **MiBLSi:** Michigan's Integrated Behavior and Learning Support initiative-creates capacity for an integrated behavior and reading Multi-Tier System of Supports that can be implemented with fidelity, is sustainable over time and utilizes data-based decision making at all levels of implementation so students become better readers with the social skills necessary for success.
- **DCA:** District Capacity Assessment. An evaluation tool used to assess need for capacity building at the District Level, plan for improving District Capacity to implement Evidence-based Practices, and assess changes in capacity as a result of development efforts.
- **DMCA:** District MTSS Capacity Assessment. An evaluation tool used to assist Districts with implementing a multi-tier system of supports, assessing the need for capacity building at the District level and changes in capacity as a result of development efforts.
- **ASSIST:** Adaptive System of School Improvement Support Tools. An online statewide consolidated school and system improvement process/tool designed to support schools and school systems in translating state goals, annual targets and strategies into specific actions at the system, school, classroom and student levels.
- **Cabinet leadership:** Individuals with executive leadership within the DISTRICT. Sometimes called the administrative council
- **Capacity building:** Process for developing local competencies and structures to implement MTSS practices with fidelity that will endure over time
- **Coaching:** A process that facilitates educational personnel individually or as a member of a team to implement effective practices with fidelity and durability
 - **Practice-level coaching:** Coaching an individual on a specific practice that improves the individual's competency in providing that practice. (Sometimes called instructional coaching)
 - **System-level coaching:** Coaching a team to improve the quality and effectiveness of the team in developing the organization
- **Direct service:** Application of practices provided directly to receivers of these practices
- **Evidence-based practice:** A strategy or activity set that has been documented as effective for a specific population through research methodology
- **Impact data:** Information that describes the effect on receivers and the organization (e.g., teachers, administrators, and students) through the application of research-based practices
- **Implementation data:** Information that describes how well a practice is implemented (e.g., fidelity, implementation stage)
- **LEA:** Local Education Agency. This is the local school District
- **Management structure:** The identification of individual functions and procedures in providing guidance and coordination for the implementation of MTSS practices. The individuals providing

guidance and coordination for implementation fall within two groups: (1) Cabinet Leadership Team and (2) Implementation Team

- **MTSS:** Multi-Tier System of Supports. An integrated, multi-tier system of instruction, assessment, and intervention designed to meet the achievement and behavioral needs of all learners.
- **MTSS implementation plan:** A documented set of goals, objectives, strategies and activities that includes procedures, timelines, and resources needed to implement MTSS
- **MTSS practices:** The strategies and procedures that are applied within a multi-tier system of supports
- **MTSS warehouse:** A compilation of essential documents (e.g., previous DMCA scores, MTSS implementation plan) that provide direction in outlining the plan to implement MTSS within a school, across the District, and across the county or region
- **PEP-PIP:** Policy Enabled Practice and Practice Informed Policy. A feedback cycle used by organizations across the cascading levels of a system. The purpose is to identify and remove barriers to implementation while facilitating the implementation of evidence-based practices
- **Policy:** A written plan intended to influence and determine decisions and actions
- **Professional growth plan:** A plan used to customize and enhance professional development and learning targets based on individual roles/responsibilities, strengths, and needs
- **Selection information:** Data and knowledge that are used to select the right practice to address need given the context, or to choose the right people for roles to support MTSS
- **Technical assistance:** Providing support to address a specific problem identified by the request for assistance. This assistance utilizes technical expertise to address the problem, through a short term or predetermined duration of support
- **Two-pronged approach:** Refers to the process of collecting and analyzing both implementation and impact data
- **Written practice/process:** A documented course of action that is intended to be implemented

District MTSS Capacity Assessment

DISTRICT: _____

Date: _____

Implementation Team Members:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____

Directions

1. Assign roles and responsibilities:
 - Facilitator
 - Ensures team members are equally engaged throughout the process by reading the items, and encourages and acknowledges all members
 - Gathers input related to the rating and evidence that supports the rating
 - Gains consensus from team members for the rating of each item
 - Respectfully tables lengthy conversations on items in order to have sufficient time to complete the assessment
 - Recorder
 - Identifies the District name, date, and names of Implementation Team members
 - Records scores for each item based on consensus from team members
 - Completes the Score Sheet located on the last page
 - Highlights any of the Indicators of Full Implementation that are true for the District Implementation Team
 - Records any additional evidence
 - Provides MiBLSi and the ISD with a copy of the entire completed document
 - Time keeper
 - Determines in collaboration with the facilitator and team members when to notify the team of time remaining (e.g., half-way, 15 minutes remaining, etc.)
 - Ensures all team members are aware of the allotted time to complete the measure
 - Team member
 - Actively contributes to the process
 - Manage air time so all voices can be heard
 - Agree to table conversations about items or Indicators of Full Implementation that prevent the team from moving forward
 - Arrive at consensus on ratings
 - Assist in developing strategies and activities to address areas of need revealed by the measure

2. For each of the 28 items on the DMCA, read the item and the corresponding indicators of full implementation. Items marked **bold** are high leverage items that should be given priority when developing an action plan based on the DMCA results.
 - The team should decide in advance whether to read each item and indicators aloud as a group or silently and individually.
3. Each item has a value of 0, 1, or 2 to indicate the level of implementation:
 - 0 = Not in Place
 - 1 = Partially in Place
 - 2 = Fully in PlaceWhen team members are in disagreement on an appropriate value, use the lower score.
4. Discuss any evidence that supports a rating of 0, 1, or 2 for each item and document additional supporting evidence:
 - The team should base their evidence on team outcomes and, if specified, District-level outcomes (e.g. other staff performance, activities).
 - If permanent products or deliverables are not available, participants' perceptions should be used when determining an appropriate response.
 - The recorder will circle or highlight any of the indicators of full implementation that are true for the District Implementation Team.
 - When additional evidence exists for an item but is absent from the indicators rubric, please denote in the Additional Evidence and Notes section.
 - If a note is warranted, please denote in the Additional Evidence and Notes section.
5. The recorder will circle the appropriate score for each item based on team consensus. The score will be recorded in two places: next to the description of each item and also in the Score Summary Sheet on the last page of this document.
6. After all items have been rated, calculate the subscales and total scores on the Score Summary Sheet.
7. Upon completion of the Score Summary Sheet, use the results from the total, subscale, and item scores to develop short-term and intermediate activities to improve District capacity to support schools in the implementation of MTSS with fidelity and durability. These action items should be integrated into the District implementation support plan.

Leadership Driver

A. Vision							
EVALUATION CRITERIA	INDICATORS OF FULL IMPLEMENTATION						
<p>1. District MTSS implementation plan is associated with a long-term vision of developing capacity for MTSS implementation over time and aligns with all components required within the ASSIST platform.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td colspan="3" style="text-align: center;">Indicate Team Rating:</td> </tr> <tr> <td style="text-align: center;">0 Not in Place</td> <td style="text-align: center;">1 Partially in Place</td> <td style="text-align: center;">2 Fully in Place</td> </tr> </table>	Indicate Team Rating:			0 Not in Place	1 Partially in Place	2 Fully in Place	<ul style="list-style-type: none"> • District implementation plan includes the following components: goal(s), objective(s), strategies, and activities related to capacity. The plan aligns with the school improvement plan structure of the ASSIST platform. • Goals, objectives, strategies and activities are logical given the needs within the district. • The plan encompasses at least 2 academic years. • The plan is based on the vision and priorities established by district executive leaders (cabinet) <p>Additional Evidence and Notes:</p>
Indicate Team Rating:							
0 Not in Place	1 Partially in Place	2 Fully in Place					
<p>2. District follows a written process for integrating multiple initiatives/practices to avoid confusion, silos, and duplication of effort.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td colspan="3" style="text-align: center;">Indicate Team Rating:</td> </tr> <tr> <td style="text-align: center;">0 Not in Place</td> <td style="text-align: center;">1 Partially in Place</td> <td style="text-align: center;">2 Fully in Place</td> </tr> </table>	Indicate Team Rating:			0 Not in Place	1 Partially in Place	2 Fully in Place	<ul style="list-style-type: none"> • MTSS is intentionally braided into initiatives/practices so internal District staff see the integration rather than view each initiative/practices as separate. • The implementation team establishes a process for braiding initiatives/practices. <p>Additional Evidence and Notes:</p>
Indicate Team Rating:							
0 Not in Place	1 Partially in Place	2 Fully in Place					

<p>3. District has and enacts a formal procedure for selecting initiatives/practices that are evidence-based and integrated/aligned with the District vision for MTSS.</p> <table border="1" data-bbox="212 338 583 564"> <tr> <th colspan="3">Indicate Team Rating:</th> </tr> <tr> <td>0 Not in Place</td> <td>1 Partially in Place</td> <td>2 Fully in Place</td> </tr> </table>	Indicate Team Rating:			0 Not in Place	1 Partially in Place	2 Fully in Place	<ul style="list-style-type: none"> The Implementation Team has a procedure for selecting evidence-based practices that requires thoughtful analysis of the following variables: need, fit, resources, evidence, readiness for replication, capacity to implement. The procedure is documented (written and accessible). The procedure is consistently used. <p>Additional Evidence and Notes:</p>
Indicate Team Rating:

EVALUATION CRITERIA	INDICATORS OF FULL IMPLEMENTATION						
<p>25. Selection information is used by appropriate district department leadership and staff to identify targeted competency development needed for new and existing personnel who are assigned to assist in the MTSS work to effectively support MTSS implementation.</p> <table border="1" data-bbox="172 569 542 762"> <tr> <th colspan="3">Indicate Team Rating:</th> </tr> <tr> <td>0 Not in Place</td> <td>1 Partially in Place</td> <td>2 Fully in Place</td> </tr> </table>	Indicate Team Rating:			0 Not in Place	1 Partially in Place	2 Fully in Place	<ul style="list-style-type: none"> District leadership and appropriate staff (e.g., Implementation Team, ancillary staff, consultants, etc.) recognize it might not be feasible for a candidate to effectively demonstrate all of the skills necessary for the job they have been selected to do. Based on the information gleaned during the selection process, areas of need are identified for targeted training supports. District leadership and appropriate staff (e.g., Implementation Team, ancillary staff, consultants, etc.) also recognize that all staff (team members and broader district staff included) cannot possibly know all there is to know related to MTSS implementation. Consequently, targeted training supports are required for all staff to continuously deepen individuals' knowledge. An individual development plan (IDP) is established for individuals working in new positions that provides a roadmap of areas that need skill development and the venue in which they will be developed (e.g., attendance at a conference, on-line modules, reading a book or articles) The IDP includes indicators of growth / success that are measured using a combination of self-reporting, observation, and / or product review <p>Additional Evidence and Notes:</p>

I. Training

EVALUATION CRITERIA

27. District provides opportunities for on-going training for district staff to fulfill their role in supporting implementation in specific MTSS data/systems/practices.

Indicate Team Rating:

0	1	2
Not in Place	Partially in Place	Fully in Place

INDICATORS OF FULL IMPLEMENTATION

- The team develops a process for how to accurately determine specific areas team members and staff need to deepen knowledge in MTSS data/systems/practices.
- Based on the needs, the team develops a plan for how to address the continuum of needs. The plan may include on-site training provided by another district consultant who already has the skillset, contracting with someone to come to the district to provide the needed training or send people to a conference that is aligned with the identified need. Accessing on-line modules and reading specific articles and books are also mechanisms staff can use to deepen their knowledge.
- This process is done proactively and is aligned with the district's MTSS implementation plan. This window of time allows for thoughtful planning for providing skill development as well as time for the individual(s) who will be supporting the data, systems, and practices to apply their learning.

Additional Evidence and Notes:

J. Coaching

EVALUATION CRITERIA	INDICATORS OF FULL IMPLEMENTATION						
<p>28. District provides opportunities for on-going coaching support for district staff to fulfill their role in supporting implementation in specific MTSS data / systems / practices</p> <table border="1" data-bbox="183 453 553 646"> <tr> <td colspan="3" data-bbox="183 453 553 485">Indicate Team Rating:</td> </tr> <tr> <td data-bbox="183 485 313 646">0 Not in Place</td> <td data-bbox="313 485 443 646">1 Partially in Place</td> <td data-bbox="443 485 553 646">2 Fully in Place</td> </tr> </table>	Indicate Team Rating:			0 Not in Place	1 Partially in Place	2 Fully in Place	<ul style="list-style-type: none"> • The team develops a process for how to accurately determine specific areas team members and staff need to deepen knowledge in MTSS data/systems/practices. • Based on the needs, the team develops a plan for how to address the continuum of needs through both initial training as well as ongoing coaching support. • Coaching support is provided along a continuum of need and intensity. It includes skill development, observation, and feedback all related to the specific responsibilities of individuals in supporting MTSS. • This process is done proactively and is aligned with the district's MTSS implementation plan. This window of time allows for thoughtful planning for providing skill development as well as time for the individual(s) who will be supporting the data, systems, and practices to apply their learning. <p>Additional Evidence and Notes:</p>
