

KinderTEK®

iPad math instruction for the youngest learners at home and school

Mari Strand Cary, Ph.D.

Center on Teaching & Learning, University of Oregon
State Personnel Development Grants Directors' Webinar
Online May 7, 2020

Center on Teaching & Learning

UNIVERSITY OF OREGON

What IS KinderTEK?

A flexible and customizable system of iPad-based foundational math instruction to suit a wide variety of needs and learning contexts.

For what purposes can KinderTEK be used?

Use case

Intervention for early elementary students struggling with kindergarten math content

Kindergarten math **supplement** (even “homework”)

Kindergarten **readiness tool** for preschoolers

Positive math-based screen time for kids at after-school programs, daycares, or home

Why KinderTEK?

- Students come to school with vastly different backgrounds in mathematics knowledge
- Early mathematics skill is highly predictive of later mathematics achievement
- Unless we identify at-risk students and intervene early, serious problems are likely to develop and remain relatively intractable over time
- What we know about mathematics lags far behind what we know about reading
- Significant interest in improving the mathematics (and STEM) performance of the nation's students

Student need often exceeds resources and capacity

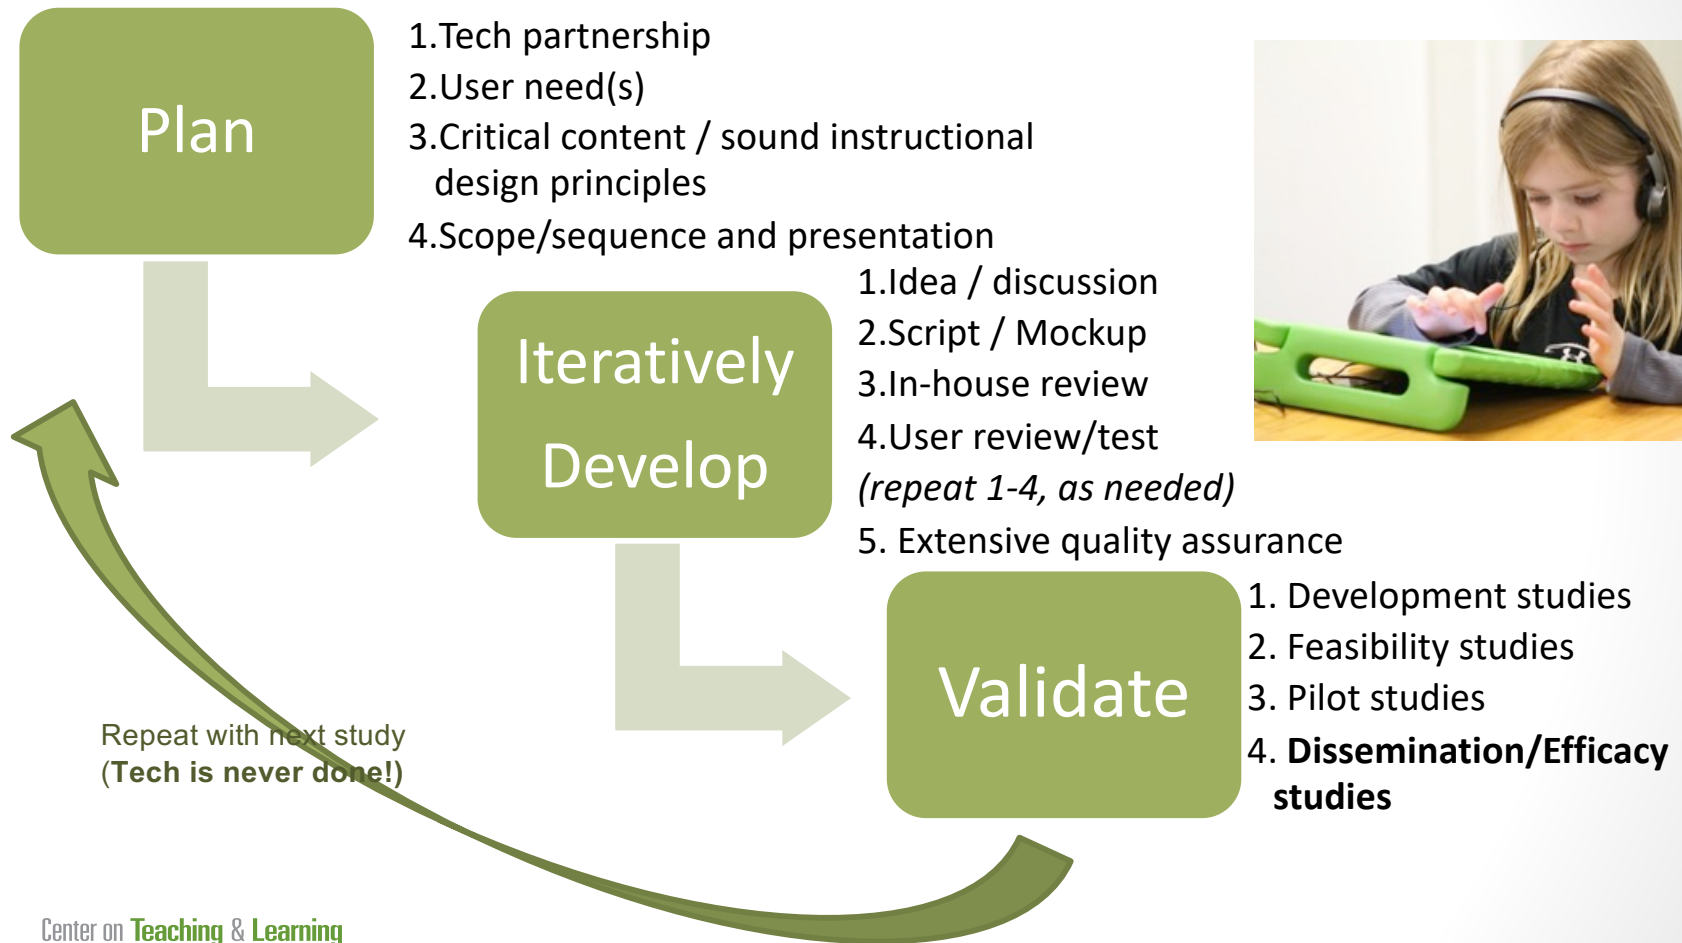

Students all learning?

Small group work, one-on-one instruction, and DBDM!

Center on Teaching & Learning

Federally-funded development of KinderTEK

ASPENS Composite

start —●— early -▲- late

Interpreting the previous data slide:

- Our efficacy study just got interrupted by COVID. But we do have small-scale results from our development studies. Years ago, for example, we compared students who started KinderTEK earlier in the year to those who used it later in the year. All participants were getting their core math instruction at the same time. Teachers implemented in many ways and some student had very little KinderTEK exposure while others had much exposure. So it was a “messy” study.
- Even with all that noise, we saw that kids who used KinderTEK early on (the red line) made larger gains on a standardized progress monitoring measure (ASPENS) between T1 and T2 than their comparison peers who did not use KinderTEK then (the blue dotted line).
- When those comparison students DID start using KinderTEK, it seemed to have made a difference even late in the year...their line was a lot steeper between T2 and T3.
- For each of the subtests on the ASPENS measure (i.e., magnitude comparison, missing number, number identification) we got a pattern like that shown here for the ASPENS composite score.

How does KinderTEK work?

How does KinderTEK work? It blends...

- Principles and best practices from special education & teacher-led intervention research
- Engagement, motivation, and user-interface practices used by gaming and software companies
- Opportunities inherent to 1:1 instruction and iPads
- Understanding of classroom and home constraints

The image shows a screenshot of the KinderTEK software interface. At the top, the text 'KinderTEK' is displayed in a large, white, sans-serif font. Below the title, there are two buttons: 'Use as Guest' and 'Manage Users'. The background of the interface is a vibrant, cartoonish savanna scene. In the foreground, there are several anthropomorphic animals: a panda on the left, a penguin in the center, a yellow bird-like creature to the right of the penguin, a young girl with brown hair in the center, and a lion on the right. In the background, a monkey is hanging from a tree branch. The overall aesthetic is bright and child-friendly.

...TO OFFER ENGAGING, CUSTOMIZED,
DIFFERENTIATED INSTRUCTION

KinderTEK system

App: Math instruction, reporting & management & supports
Available on App Store

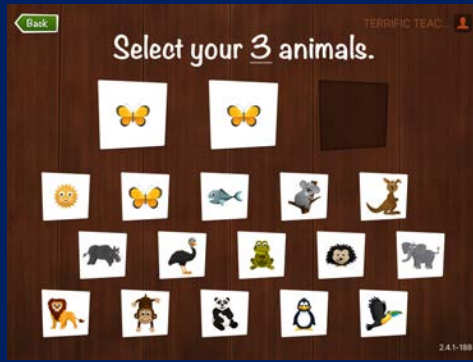

Pro Basic

Web-based
Data dashboard (Pro only)

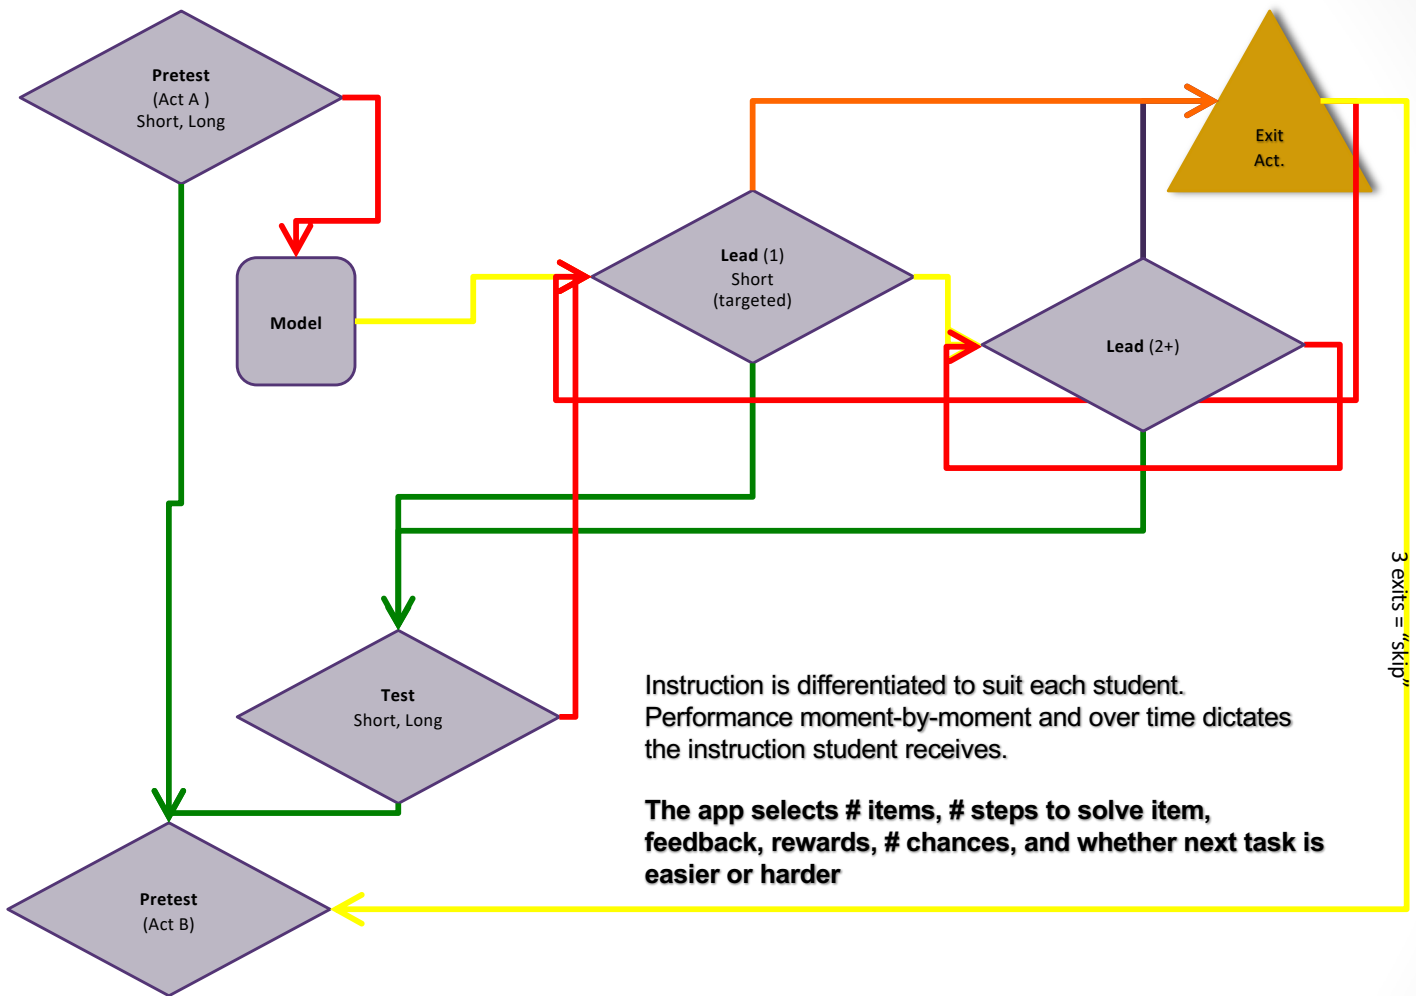

Website
(www.KinderTEK.com)
with training & resources

- Ease-to-use login and navigation
- Explicit instruction (51 activities)
 - Critical math content
 - Customized supports
 - Model—Lead—Test
 - Visual math models to drive home concepts
 - ADAPTIVE
 - Content, supports, feedback, pacing, etc. depends on student actions and engagement

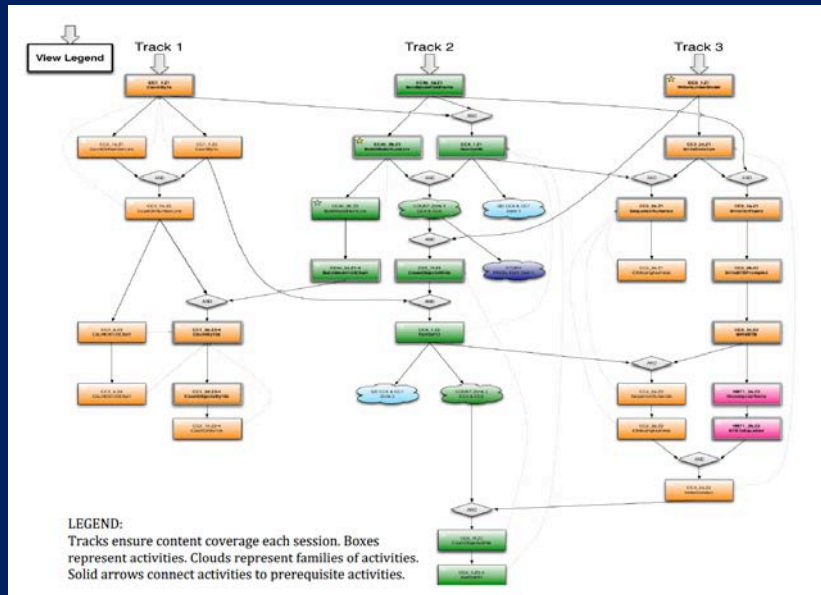

Instruction is differentiated to suit each student. Performance moment-by-moment and over time dictates the instruction student receives.

The app selects # items, # steps to solve item, feedback, rewards, # chances, and whether next task is easier or harder

Students choose activities
in *exploration* mode
(anything goes!)

Sequenced, directed, & screening modes use carefully-chosen lesson sequence

“Sequenced” mode is the default...
but other modes might better fit needs

Use case	What mode might be good?
Intervention at school	<ul style="list-style-type: none"> • <i>Sequenced</i> for independently-paced <u>learning</u> • <i>Directed*</i> to complement class instruction
Supplement at school, home or after-school programs	<ul style="list-style-type: none"> • <i>Exploration</i> if all skills already mastered (or perhaps if working with peer or aide)
Readiness tool anywhere	<ul style="list-style-type: none"> • <i>Sequenced</i> for independently-paced learning • <i>Exploration</i> if all skills already mastered
Positive math-based screen time anywhere	<ul style="list-style-type: none"> • <i>Sequenced</i> while still learning • Change to <i>exploration</i> when all skills already mastered (or perhaps if working side-by-side with older sibling or adult)

**May need adult assistance if any user-interface elements new-to-child*

How can KinderTEK “look” in different contexts?

Use case	For whom?	How might it look?
Intervention at school	Struggling K-Gr3	<ul style="list-style-type: none"> • Small-group rotations, pull-out programs, alternative seatwork • Multiple educators can access students (e.g., Gen Ed & SPED)*
Supplement at school, home or after-school programs	On-track or struggling K-Gr1, PreK	<ul style="list-style-type: none"> • Centers, small-group rotations, free-choice time, alternative seatwork • Multiple educators can access relevant students; parents or care-providers can access just their students*
Readiness tool anywhere	PreK (and into K?!)	<ul style="list-style-type: none"> • Parents and/or care-providers take on “teacher” role
Positive math-based screen time	PreK-Gr1	<ul style="list-style-type: none"> • Parents and/or care-providers take on “teacher” role

* Student uses same account for uninterrupted experience across contexts

Ways teachers reported using KinderTEK in a recent survey

“Used KinderTEK with whole group several times a week and alternated with I-Ready. Allowed me to assess and assist individually”

“3 days a week 1/2 of the class does KinderTEK for 20 minutes, then second 1/2 switches on”

“KinderTEK was a small group rotation for math centers, but the children used it independently.”

“It was used during our rest time. [1/2 class at a time]”

“As an intervention, then added whole class”

“Early finishers in math time, free choice at centers, some days small groups”

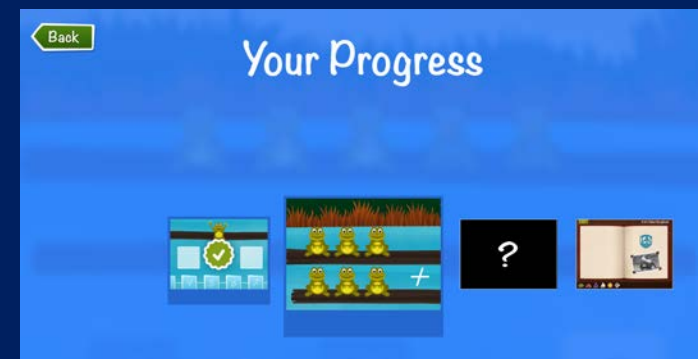

“I started using it as an intervention with struggling students in a pullout setting. Then it was added to the Kindergarten classrooms for use with all students during free choice = math time.”

“In math small groups”

“Students worked on KinderTEK while I pulled small groups”

“Free choice time”

- Self-monitoring
- Rewards & motivation
 - Focused on math, mastery, and perseverance!

Get KinderTEK!

KinderTEK teaches critical math concepts. It is based on a successful instructional model that introduces new concepts through modeling, engages students with guided practice, and seamlessly tests students on their knowledge while building fluency. Through it all, kids are having fun learning math and earning rewards.

Feature	Basic	Pro
Limited to 1 teacher/parent and up to 30 student accounts	✓	
Unlimited teacher/student accounts		✓

KinderTEK will work for you.

It can work better with planning & monitoring

KinderTEK (pre-COVID)? Over 5000 students and nearly 300 adults in over 125 schools and 50 districts.

“It is a great way for us to ease into our math instruction after lunch and recess.”

“I loved introducing a 'new' skill to my K's and a student saying, "I already know that! I learned it on KinderTEK!"”

“No math curriculum is perfect, so having a secondary piece that they can pop into, practice the skills that they need to work on, and just really gain that knowledge that they need is really good to support any math curriculum.”

Love having KinderTEK available, especially at the beginning of the year!

(To parent and student) "You're really going to love KinderTEK! It's a fun math learning game that works on all kinds of kindergarten math skills."

“And I think teachers shouldn't be scared of it because it's not scary, and is really user friendly. And our five-year-olds can do it really well. We shouldn't feel scared of it.”

“It was rewarding to see the students who struggle with math experience success with KinderTEK. It helped them to understand new concepts, as well as master concepts through repeated practice.”

KinderTEK was an exciting fun way to practice math! We LOVED it!

“With KTEK, they're able to really be independent and to go at their own pace.”

“...they love it and it's so fun. Well, that's the best. That's what we want them to do for all their experiences, to enjoy and have fun in learning new things.”
